Stanford dt+UX^2 Software Project Launch Party!

6:15-8:30PM
Thursday, March 16th, 2017
Packard 101

About the Launch Party
Food. Final Projects. App downloads! You're invited to the CS194H dt+UX^2 Software Project Launch Party! Learn about and try out the 5 capstone projects developed by students in this year's CS194H human-computer interaction (HCI) design project capstone in Computer Science (CS) on Thursday, March 16th 2017 6:15-8:30PM in Packard 101!

Each team will present their quarter's work over dinner followed by an open hour to download their applications, mix, and provide feedback.

About CS194H
CS194H is a project-based capstone course in Computer Science (CS) for Stanford students interested in Human-Computer-Interaction (HCI) and Design. The majority of students take the class to fulfill a senior capstone requirement that all CS majors have to fulfill. The course focuses on user experience design through a quarter-long project that continues an existing prototype started in our introductory HCI course (CS147: Introduction to Human-Computer-Interaction). This quarter the focus is on building mobile products. The 5 student team projects cover topics from education to collaborative music-sharing.

Each of this quarter's five teams is comprised of an interdisciplinary group of upperclassmen with strengths in design and development. The teams tackle deliverables throughout the quarter towards a finished, polished product culminating in a real world ready launch. See an overview of this quarter's projects here: http://hci.stanford.edu/courses/cs194h/2017/wi/projects.html

RSVP Details
Please RSVP before Tuesday, March 13th to guarantee a seat and food!
